The Instant AI Resume Polishing Kit

A £10–£30-per-document freelance service in a box

The Instant AI Resume Polishing Kit

A done-for-you freelance service in a box: the AI prompts that rewrite any resume into metric-driven, recruiter-magnet bullets — plus the exact gig copy, offer posts, and delivery templates to charge £10–£30 a document from day one.

This kit is two things at once: (1) a tool to instantly upgrade your own resume, and (2) a complete micro-business you can run on Fiverr, Upwork, or Reddit this week.

PART 1 — The transformation engine (AI prompts)

The whole service rests on one skill: turning weak, duty-based bullets into strong, results-based ones. These prompts do it instantly.

Prompt 1 — The Master Bullet Rewriter

Role: Executive resume writer and former FAANG recruiter.
Task: Rewrite these resume bullets to be high-impact. For each bullet: lead with a strong action verb, quantify the result (use a realistic estimated metric where none exists, and flag it as [ESTIMATE – confirm]), and show business impact, not just activity.
Format: keep each to one line. Output before → after side by side.
Bullets: [PASTE]

Prompt 2 — The Metric Extractor

Task: I'll describe a job responsibility in plain language. Ask me up to 3 sharp questions to uncover a quantifiable result (% , £ , time saved, people, volume), then write one powerful metric-driven bullet from my answers.
Responsibility: [PASTE]

Prompt 3 — The ATS Keyword Optimiser

Task: Here is a target job description [PASTE JD] and a resume [PASTE RESUME]. List the key skills/keywords the ATS will scan for that are missing or weak in the resume, then rewrite the summary and top 5 bullets to naturally include them without keyword-stuffing.

Prompt 4 — The Professional Summary

Task: Write 3 versions of a 3-line professional summary for a [ROLE] with [X years] experience targeting [TARGET ROLE]. Confident, specific, results-oriented. No clichés ("hard-working team player").

Prompt 5 — The Achievement Amplifier

Task: Take this ordinary accomplishment [PASTE] and reframe it 3 ways – emphasising (a) revenue/cost impact, (b) leadership/scale, (c) efficiency/innovation – so I can pick the angle that best fits the job I'm applying for.

Prompt 6 — The Cover-Letter Companion (upsell)

Task: Write a 200-word cover letter for [NAME] applying to [ROLE] at [COMPANY], drawing on these resume highlights [PASTE]. Open with a hook, connect their experience to the company's need, end with confidence. No "To whom it may concern."

PART 2 — Before & After (the proof that sells)

Project Manager - *Before*: "Responsible for managing software project deadlines." - *After*: "Orchestrated cross-functional delivery of 12 enterprise software sprints, cutting delivery lead-time by 34% and saving an estimated £45,000 annually."

Sales Representative - *Before*: "Handled customer inquiries and sold products." - *After*: "Drove outbound sales across 150+ B2B accounts, generating £120,000 in new recurring revenue within 6 months."

Marketing Coordinator - *Before*: "Helped run the company's social media accounts." - *After*: "Grew organic social following 3x (4k → 12k) in 8 months and increased content-driven leads by 40% through a data-led posting strategy."

Customer Service Agent - *Before*: "Answered customer questions and resolved complaints." - *After*: "Resolved 60+ daily customer tickets at a 96% satisfaction rating, reducing average handle time by 22%."

Software Developer - *Before*: "Worked on the company's main web application." - *After*: "Shipped 30+ features to a 50k-user web app, cutting page load time 45% and reducing production bugs 30% through a new test suite."

Operations Assistant - *Before*: "Managed office supplies and scheduling." - *After*: "Streamlined procurement and scheduling for a 40-person office, saving 8 hours/week and cutting supply costs 18%."

Teacher / Educator - *Before*: "Taught a class of students." - *After*: "Raised class exam pass rates from 74% to 91% over two terms through a restructured, data-informed lesson plan."

Retail Manager - *Before*: "Ran the store and managed staff." - *After*: "Led a 12-person team to a 15% YoY revenue increase and the region's top customer-satisfaction score."

The pattern every time: Action verb + what you did + the number + the business impact. Teach the AI this and it never misses.

PART 3 — The gig (ready to copy-paste)

Fiverr / Upwork gig

Title: I will rewrite your resume bullets with high-impact executive metrics in 1 hour

Packages: - **Basic — £10:** Rewrite up to 8 bullet points. 24-hour delivery. - **Standard — £20:** Full resume rewrite (bullets + summary), ATS-optimised for one job. 24-hour delivery. - **Premium — £30:** Full resume + matching cover letter + LinkedIn "About" section. Same-day delivery.

Description:

Recruiters spend 6 seconds on your resume. If your bullets say "responsible for..." instead of showing results, you're invisible.

I transform weak, duty-based bullets into powerful, metric-driven achievements that make recruiters stop and read:

✗ "Responsible for managing sales leads."

✓ "Spearheaded outbound sales across 150+ accounts, generating £120k in new revenue in 6 months."

- ✓ 1-hour turnaround available
- ✓ ATS keyword optimisation included (Standard+)
- ✓ Unlimited revisions until you're thrilled
- ✓ Works for any industry or experience level

Send me your current resume or rough bullets and I'll make you unignorable. Message me first if you're unsure which package fits.

Reddit / social offer post (free-lead-magnet version)

Title: I'll rewrite one resume bullet with real metrics for free — drop it below

Recruiters skim resumes in seconds. "Responsible for X" gets ignored; "Increased X by 34%" gets interviews.

Reply with ONE bullet point from your resume and I'll rewrite it with high-impact metrics for free, right here in the comments.

If you want your whole resume done, I do full rewrites for £15 with a 1-hour turnaround — but the free one is genuinely free, no DM required.

This post is a lead machine: public free rewrites are proof + advertising in one. Every reply is a warm prospect for the paid version.

PART 4 — Delivery templates (look pro, save time)

Order-received message

Thanks for your order! To get you the strongest result, send me:

1. Your current resume (or the bullets to rewrite)
2. The job/role you're targeting (a link is perfect)
3. Any wins you're proud of that aren't on there yet

I'll have your polished version back within [turnaround].

Delivery message

All done – your rewritten [bullets/resume] are attached.

What I changed:

- Led every bullet with a strong action verb
- Added quantified impact (I've marked estimates with [confirm] – swap in your real numbers where you have them)
- Optimised for ATS keywords from your target role

Happy to tweak anything – revisions are included. If it lands you an interview, a quick review would mean the world. 🙌

The natural upsell

Want me to write a matching cover letter and polish your LinkedIn "About" section too? I can do both for £[15] and have them back today – they work best as a set with the resume we just built.

PART 5 — Scaling this into real income

- **Speed is the product.** "1-hour turnaround" wins orders competitors lose to slow delivery. AI makes it trivial.
- **Always mark estimates.** Never invent a specific number and present it as fact — write "[ESTIMATE — confirm your real figure]." Integrity keeps your reviews 5-star and you out of trouble.
- **Stack the offer:** resume → cover letter → LinkedIn → interview prep. One customer, four sales.
- **Collect reviews relentlessly.** On gig platforms, review count is everything. Ask every single time.
- **Do the maths:** 3 Standard orders a day = £60/day = ~£1,800/month, at ~20 minutes of real work each. This is one of the fastest £0-to-income freelance services that exists.
