4K OLED Wallpaper & Watch-Face Prompt Pack

50+ tested AI-image prompts for generating unlimited ultra-high-contrast dark-mode wallpapers and luxury smartwatch faces — plus 12 ready-to-use 4K images included, and the full guide to selling them on Etsy & Gumroad.

Works with Midjourney, DALL·E, Gemini/Imagen, Leonardo, and Stable Diffusion. Every prompt is engineered for true-black (#000000) OLED backgrounds that look premium and save battery.

What's in this pack

- **12 finished 4K images** — ready to list and sell today (see the `/images` folder).
- **50+ prompt templates** across 6 collections — generate infinite variations.
- **The full selling playbook** — listing copy, pricing, licensing, and where to sell.

Why OLED / true-black wallpapers sell

On OLED screens (iPhone 15/16 Pro, Samsung Galaxy S/Note, Pixel Pro, Apple Watch, WearOS), a `#000000` pixel is literally switched off — so true-black wallpapers look infinitely deep AND save battery. Buyers actively search "OLED wallpaper," "AMOLED black wallpaper," and "dark mode wallpaper pack." It's an evergreen micro-niche with repeat buyers and near-zero delivery cost.

Technical rules baked into every prompt below: - Background is pure `#000000`, not dark grey. - High contrast between the subject and the void. - Composition leaves the top third clear for clock/watch faces. - Aspect ratios: `--ar 9:16` for phones, `--ar 1:1` for watch faces, `--ar 16:9` for desktop.

Licensing — be clear and honest

Sell a **personal-use licence** by default ("for your own devices"). Offer a **commercial/extended licence** as a pricier tier if buyers want to use images in their own products. Note in your listing that the images are AI-generated. Do **not** claim the prompts produce trademarked characters or copyrighted styles — keep everything original and abstract, which is exactly what this pack is built around.

Make more sales

- List the same pack on Etsy AND Gumroad — different audiences.
- Use 2–3 of your best images as the listing preview (mockup them on a phone frame — free tools like Canva do this).
- Bundle wallpapers + prompt pack for a higher average order value.
- Add new collections monthly; repeat buyers are the easiest money.
